ABSTRACT

AN ARRANGEMENT FOR AND A METHOD OF MANAGING A HERD OF ANIMALS

5 An arrangement for managing a herd of animals. Said
arrangement comprises an animal identification system. The
arrangement comprises a central unit provided with a computer
having a memory, said memory containing per animal data in
relation to the hierarchic order. The memory contains per
10 animal data in relation to the jostling behaviour. A method
of managing a herd of animals. In the method a number of
automatic animal related treatments are performed. The method
comprises the step of determining the hierarchic order of an
animal, the performance of at least one of the automatic
15 animal related treatments being controlled at least on the
basis of the determined hierarchic order of an animal.
